## **DELAWARE HONORED FOR CYBER SECURITY WEBSITE National Consortium Selects the Top Websites in the Nation**

Dover – The Department of Technology and Information (DTI) has been named a finalist in the first annual BEST OF THE WEB Contest. The Cyber Security websites for all 50 State governments were examined based on their content, design, readability, ease of use, and frequency of updates.

New York, Pennsylvania, **Delaware**, Ohio, Oklahoma, and Oregon were selected as the top 6 websites in the nation.

Delaware's Chief Information Officer Jim Sills, III said, "This award is a testament to the outstanding progress we have made in bringing cyber security information to Delaware's citizens. Our team has worked hard to compile valuable information for our visitors to help keep them safe when they are online."

"Our cyber security website is part of a comprehensive education and awareness campaign for state employees, small businesses, schools, and our citizens", said DTI Chief Security Officer Elayne Starkey.

Delaware's Cyber Security website offers the latest information on cyber security news, events, videos and tools. A special section for kids provides links to games, puzzles, and videos designed to protect them from cyber bullying and online predators. The Parent's Page provides direct access to resources for keeping our children and ourselves safe on the Internet. There is also a notification service, where citizens can sign up for email Security alerts and advisories. Valuable information for all website visitors is just a click away.

The BEST OF THE WEB contest was sponsored by the Multi-State Information Sharing and Analysis Center, a collaboration of state and local governments that focuses on enhancing cyber threat prevention, protection, and response and recovery throughout the nation.
